

Student Aid Front 2 Back Slideshow Presentation

Slideshow Terminology

Slide – Each new content page in PowerPoint is called a slide.

Transition – A visual effect that introduces a slide during a slideshow.

Animation – This includes text and object movements that occur during a slideshow.

Build – When text or graphics are added on a slide incrementally with each new click.

Delay – How long it takes for the next animation to appear on the slide.

Slideshow Design and Intent

- Serves as a tool for the Facilitator to guide the participants through the course.
- Includes content from Presenter Guide and Participant Guide in abbreviated form.
- Incorporates transitions and animation to focus the participants' attention on the slides.

Slides That Build (click numbers do not include initial click to get onto the slide)

Slide Number/ Title	Why does it build?	Additional Clicks	# Of Clicks
Slide 2 What's a Penny?	To keep the picture of the penny and the quote hidden until the exercise is done.	Reveal Penny Pictures = Click 1 Reveal Lincoln Quote = Click 2	2
Slide 21 Three Moments of Truth	To allow the presenter to talk about each moment of truth individually, keeping the participants attention focused on the one that is being discussed.	Reveal Apply = Click 1 Reveal Receive = Click 2 Reveal Repay = Click 3	3
Slide 27 What is Need?	To reveal the need formula after EFC and COA have been defined.	Reveal Need Formula = Click 1	1
Slide 44 – 52 Pop Quiz	To reveal the answer to the quiz question.	Reveal Answer = Click 2	1
Slide 57-58, 60-64, 66-69 Player Card Debrief	To reveal process information at the presenter's pace while keeping the participants attention focused.	Reveal Answer = Every click	3-8
Slide 77 The Channels	To reveal which area of the process each channel touches, one channel at a time.	Reveal Students = Click 1 Reveal Schools = Click 2 Reveal FP = Click 3	3
Slide 83 The Enterprise Wide Functions	This allows the presenters to first talk about what the functions are individually, then as a group.	Reveal Term "Enterprise Wide Functions" = Click 1	1
Slide 86 New SFA Structure	This slide explains the new structure of SFA in a gradual way so that the participants understand each piece.	Reveal Upper Half of Org= Click 1 Reveal CIO, COO, CFO = Click 2 Reveal Enterprise Services = Click 3	3
Slide 98-#105 The Measurement Model	Each new click adds a layer to the measurement model. This allows the participant to slowly digest the information as the presenter explains it.	Reveal Student Aid Process = Click 1 Reveal Ruler = Click 2 Reveal 3 Perf. Objectives = Click 3 Reveal ACSI = Click 4 Reveal Unit Cost =Click 5 Reveal Gallup = Click 6	7

		Reveal Baseline, Etc= Click 7	
Slide 116 The Value of a Penny	Allows the presenter to reveal the quote at the end of the penny section.	Reveal Quote = Click 1	1

Helpful Hints:

- Most slides utilize transitions. These will happen automatically after the initial click.
- All animation is set for less than a 2 second delay.
- Animation happens at different speeds depending on the speed of the computer.
- Participant guide page numbers are included in the bottom left hand corner of the slide.
- Make sure that the computer you are using has the screen saver turned off.
- Be careful not to advance the slideshow too far, as this could reveal information prematurely.

General PowerPoint Commands

Begin Slideshow

- Double click the icon and open the document
- Go to the slideshow dropdown menu and select “View Show”

Changing slides (once in slideshow)

- To move forward one slide, press the page down or arrow down key
- To move back one slide, press the page up or arrow up key

Exit the slideshow

- Press the Esc Key

Starting the slideshow on a specific slide

- Exit the slideshow by pressing the escape key
- Click on the “view” menu bar and select the “slide sorter” option
- Click on the slide you wish to begin with
- Begin the slideshow (see directions above)
